SPECIFICATIONS

FREQ. RANGE: 540 kc to 1700 kc
TYPE: 5 Tube Superheterodyne
I.F. Frequency 455 kc
ANTENNA: Powerful Loop Antenna
TUNING: Vernier Tuning, Airplane Type
SPEAKER: 4" P.M. Voice Coil
Impedance is 3.2 ohms
POWER OUTPUT: 0.8 Watts undistorted
1.8 Watts maximum
LINE VOLTAGE: 105 - 125 Volts AC or DC
POWER DRAIN: 29 Watts
CURRENT DRAIN: .24 Amp at 117 Volts AC
CABINET COLOR: Walnut Bakelite
CABINET SIZE: 9 3/8" Wide, 6" High,
5 1/2" Deep
WEIGHT: 5 Pounds

TUBE COMPLEMENT

1 - 12SA7 Pentagrid Converter, Oscillator
1 - 12SK7 1st. I.F. Amplifier
1 - 12SQ7 Diode Detector, 1st. Audio Amp.
1 - 50L6 Beam Power Amplifier
1 - 35Z5 Rectifier

INSTRUCTION BOOK

NATIONAL KITS has compiled a special 24 page "fool - proof" instruction book complete with diagrams, illustrations, a simple step by step construction plan, wiring and soldering techniques. This is your assurance that your kit will perform to specifications upon completion and has earned us the reputation that "NATIONAL KITS ARE EASIEST"

utation that "NATIONAL KITS ARE EASIEST"

NATIONAL KITS Model #250 Radio is one of the leading radio educational kits in the world and is accepted as a standard in the training of electronics students. The building of this kit does not require any knowledge of radio. Even an untrained beginner can easily build this complete radio, and by following our step by step training method, you will learn to perform work like a professional Radio Technician, and that is why "NATIONAL KITS ARE EASIEST."

The kit includes EVERYTHING you need at one low price.... pre-punched chassis, factory fresh dated tubes, bakelite cabinet, and all parts. NO EXTRAS TO BUY !!! The instruction manual, which we are extremely proud of, has been prepared in a simplified step-by-step method, assuring easy and enjoyable construction. It is well illustrated, containing detailed pictorial drawings and schematics that enable the builder to understand the principles he is applying. The manual also contains detailed explanations on the various circuits of the radio and how they operate, a section explaining resistor and condenser coding, wiring and soldering techniques, and many more features. You will learn symptoms and causes of troubles in radios and how to repair radios by following the instructions in the complete section on trouble-shooting hints. The kit and instruction manual represents a basic radio educational course and is an excellent trainer for students in electronics. The pre-punched extra-large chassis we provide, means easy assembly, no cluttering of parts that are clearly identified for the easiest assembly. The open flat chassis layout eliminates cramped and hard to get to places.

The Model #250 is a complete five tube radio with a powerful, built-in Hi "Q" loop antenna, encased in a handsome, attractive, bakelite cabinet. Contains AVC for stable volume control, and a powerful Alnico permanent type magnet speaker. This radio features high sensitivity, excellent selectivity, and an outstanding tone quality.

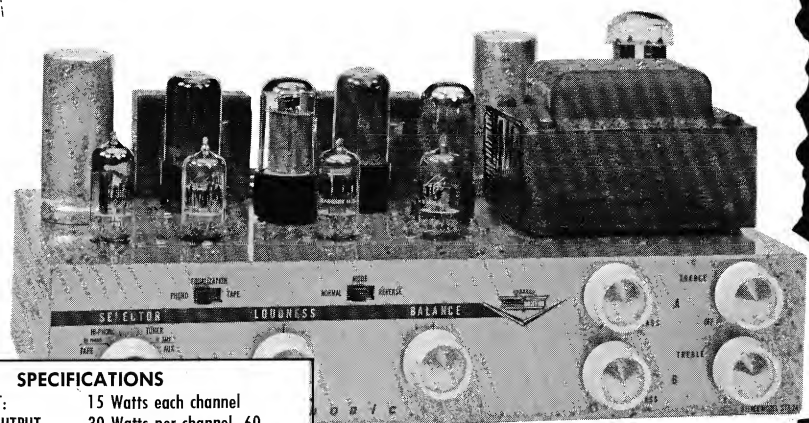

FEATURES

1. NATIONAL KITS supplies you with all quality components required to build a radio of professional design and performance. It is this special attention we give to our kits which assures you of the finest kit you can possibly buy,
2. An outstanding radio educational course providing an excellent background for T V Servicemen and Radio and Electronics Technicians.
3. Special over-sized pre-punched chassis that assures the easiest construction.
4. High Grain I.F. Transformers provide the finest performance.
5. Hi "Q" built-in loop antenna.
6. Powerful Alnico permanent type magnet speaker.
7. Low electrical power line noise pickup.
8. Excellent pickup in weak signal area.
9. Advanced modern circuit provides highest sensitivity and selectivity.
10. Vernier tuning, airplane type.
11. Heavy cadmium plated chassis, none rust in all climates.
12. Covers full standard broadcast band, 540 kc to 1700 kc.
13. Complete with attractive, walnut bakelite cabinet, cellulose acetate window, and matching knobs.
14. School inquiries invited for special attention.

NEW STEREO AMPLIFIER

MODEL NO. STA-24

National
HI-FIDELITY EQUIPMENT

SPECIFICATIONS

POWER OUTPUT: 15 Watts each channel
PEAK POWER OUTPUT: 30 Watts per channel, 60 Watts combined
FREQUENCY RESPONSE: ± 1 db 20 to 20,000 cycles
DISTORTION: Less than 1% harmonic distortion
MINIMUM VOLUME HUM: 80 db below 15 Watts Tuner, Hi Phono, and Aux; 70 db below 15 Watts Phono (RIAA position); 60 db below 15 Watts Tape Input; 55 db below 15 Watts
DUAL INPUTS (4) TOTAL 8: Tape/Lo Phono, Hi Phono (Ceramic, Crystal), Tuner, Hi Tape/Auxiliary
DUAL OUTPUTS: (2) Tape Output
OUTPUT IMPEDANCE: 4, 8, 16 ohms; special design output transformer
TAPE EQUALIZATION: NARTB
RECORD EQUALIZATION: RIAA

OVERALL SPECIFICATIONS

FRONT PANEL CONTROLS: (Total 9) Function Selector, Balance-Blend, dual ganged Loudness, separate Bass, Treble, Treble/Power, Mode Equalization
SELECTOR SWITCH: Tape/Lo Phono, Hi Phono, Tuner, Hi Tape/Aux
MODE SWITCH: Stereo Normal, Stereo Reverse
EQUALIZATION SWITCH: Phono, Tape
CONVENIENCE OUTLETS: 2 AC receptacles on rear of chassis controlled by Power Switch
SIZE: 14" wide x 8" deep (excluding knobs) x 6" high
POWER CONSUMPTION: 125 watts, 117 volts, 50-60 cps
SHIPPING WEIGHT: 18 lbs.
FINISH: Baked Hammetone, Golden Brown Finish Chassis
FRONT PANEL: Beautiful Multi-Color (Baked) luxury look front panel

TUBE COMPLEMENT—TOTAL 9

NATIONAL KITS Model #STA-24 is your outstanding STEREO buy. This all new STEREPHONIC 30 Watt WILLIAMSON type Dual Amplifier-Preamplifier offers you styling, features, and specifications never before available at this low price. NOW you can have Stereophonic Sound in your home at a price you can afford.

The NATIONAL KITS STA-24 STEREO Amplifier is the best answer for the best results from Stereo recordings. You can actually sense the stereo orchestra being right in your living room. Experience the fascinating directionality and astonishing sounds from the violin, piano, and all the other instruments. Hear everything sound so much more alive.

This one Stereo Amplifier is all you need for perfect stereophonic reproduction from Tapes, Stereophonic Records, FM-AM and Multiplex Tuners, and Microphones. Yet the cost of this complete Stereo Amplifier is less than the cost of any 30 Watt Monaural Amplifier kit on the market.

The STA-24 is a complete 2 channel Stereo Amplifier with built-in Preamplifiers on both channels. You get 30 Watts of Power Output in Stereo Operation with a reserve peak power of 60 Watts. This High Fidelity Stereo Amplifier was specifically designed to allow you to use it in any system. It is actually 3 units in one and can be used three different ways to suit your own individual requirements. You can use it as 1.) a complete Stereo Preamplifier (2 separate preamps) with two separate 15 Watt Power Amplifiers (30 Watts peak each); or 2.) a complete 30 Watt Monaural Amplifier (60 Watts peak); or 3.) a complete 30 Watt Monaural Amplifier with complete Stereo Preamplifier to convert your existing monaural amplifier into stereo and allow you to utilize your present amplifier into your Hi Fi system. EXCLUSIVE, PHANTOM CHANNEL—The Model #STA-24 contains an exclusive NATIONAL KITS feature to obtain the third or center channel. The Left and Right channels are combined to derive the third or so-called Phantom Channel and achieve a complete balance of sound. NATIONAL KITS has made provisions for several alternate methods and circuits so that your NATIONAL KITS Stereo Amplifier is never out of date.

All controls are located on the front panel of the amplifier for easy operation and convenience. There is no complication of connecting inputs and outputs from other equipment to your NATIONAL KITS Stereo Amplifier as

everything is controlled from the front panel controls which are simple to operate.

NEW, EXCLUSIVE, BALANCE-BLEND CONTROL—This exclusive NATIONAL KITS feature balances and blends both channel signals together in whatever amounts are needed to fill in the sense of spaciousness and eliminate the hole-in-the-middle effect.

The amplifier features separate Bass and Treble controls for each channel which permits the amplifier to be used as an electronic crossover for dual-channel amplifier-speaker systems. The dual ganged Loudness Control operates both stereo channels simultaneously assuring you accuracy in stereo operation. The Selector Switch permits the choosing of Tape Hi or Lo, Phono Hi or Lo, Tuner, and Auxiliary. The Mode Switch allows instantaneous selection of stereo normal or reverse.

The Equalization Switch provides Tape Input equalized to NARTB curve for playback direct from Tape Head of your Tape Transport. Tape Output permits the recording of any program material. Phono Inputs are equalized to RIAA curve on both channels for Stereo records. Inputs for Magnetic and Ceramic Phono will accommodate all future Stereo discs. There are four dual inputs, a total of eight for Channels A and B: Tape Head and Magnetic Phono, Ceramic and Crystal Phono, Tuner, and Auxiliary.

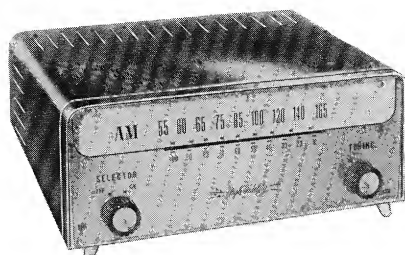

The front panel is adaptable to custom installations and makes this amplifier ideal to build into a cabinet or bookshelf. Special design Williamson type output transformers are multi-tapped at 4, 8, and 16 ohms to match the speaker systems of your choice. Two AC convenience outlets permit the amplifier to supply power to other components. The amplifier features a Self-Balance phase inverter system and Inverse Feedback Circuit.

NATIONAL KITS are the easiest to build and the STA-24 has been designed to allow even a novice to build it rapidly and accurately. The extra-large open flat chassis layout eliminates cramped and hard to get to places and makes wiring and soldering a snap. NATIONAL KITS "foolproof" instruction book is complete with diagrams, illustrations, and easy to follow step by step construction details. This is your assurance that the STA-24 will perform to specifications upon completion and has earned us the reputation that NATIONAL KITS ARE EASIEST."

AM TUNER

MODEL NO. 1200

ONLY \$19⁹⁵

10% FEDERAL EXCISE TAX INCLUDED

NATIONAL KITS, as always, offers the finest in engineering and performance, with attractive looks and a price far below what you might expect to pay. The Model #1200 assures the listener of the finest reproduction in AM sound. This advanced AM Tuner has extended frequency range for reception of high fidelity broadcasts and offers a 20-8,000 cps response. A powerful, advanced four tube circuit, plus, Selenium Rectifier provides maximum sensitivity and selectivity.

Additional outstanding features include, ultra-modern Superheterodyne Circuit with Automatic Volume Control, a powerful Ferrite loop-stick Antenna, smooth counter-weighted fly-wheel tuning, and indirectly illuminated slide rule dial with Logging Scale.

All NATIONAL KITS contain the finest In-

struction Books that have earned us the reputation "NATIONAL KITS ARE EASIEST."

SPECIFICATIONS

Frequency Response: 3db 20-8,000 cps. Frequency Range: 540 to 1650 kc; Image Rejection 30 db; I.F. Rejection 30 db. Circuit: Superheterodyne with AVC. Sensitivity: 25 μ v; 75 Microvolts/Meter. Selectivity: 8 kc Bandwidth. Distortion: Below 1% Harmonic, up to 80% modulation. Power Consumption: 25 Watts at 105-125 Volts AC. Size: 10 3/4" wide - 4" high - 8" deep. Weight: 8 pounds.

Hi-Fidelity AMPLIFIER

12 WATTS

WITH BUILT-IN PRE-AMPLIFIER

★ **Advanced-design circuit**

★ **Designed for easy assembly**

★ **Use as second Amplifier for Stereo!**

ONLY \$22⁷⁵

START YOUR OWN HI-FI SYSTEM WITH THIS LOW-COST AMPLIFIER!

This all new High Fidelity WILLIAMSON type 12 Watt Amplifier with built-in pre-amplifier offers a combination of features never available before in an amplifier at this economy price. The advanced circuitry incorporates the latest miniature tubes for low noise and hum and features a special design WILLIAMSON type output transformer multi-tapped at 4, 8, and 16 ohms to match the speaker system of your choice.

The amplifier features full front panel control and the Selector Switch allows instant selection of magnetic phono or tape, crystal phono, tuner/radio, and mike or auxiliary. Separate full range bass and treble controls allow the listener to adjust the high and low frequencies as desired. The amplifier features a powerful advanced beam power push-pull output circuit, self-balance phase inverter system, full range tone control, and inverse feedback circuit.

The construction manual contains a complete section on the latest types of circuitry used in the most advanced amplifiers. By following the circuits of your choice, you can construct your own custom Model #2200 amplifier to service your individual Hi-Fi installation. This special NATIONAL KITS feature includes circuitry for any and all types of equalization circuits, circuits for the connection of a tape head from your tape deck to the amplifier, etc. The Model #2200 can never be out of date as its versatility is unlimited.

NATIONAL KITS are the easiest to build and the clear step by step instructions makes this amplifier fun to build. The open flat chassis layout eliminates cramped and hard to get to places. There are plenty of pictorial drawings in addition to complete step by step instructions and the parts are plainly identified for the easiest construction.

The high styled front panel adds a luxury look to custom installations and will enrich any room.

FEATURES

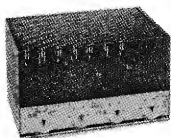

1. Williamson type 12 Watt Amplifier with built-in pre-amp featuring extended high fidelity response range.

2. Separate continuously variable full range bass boost and treble controls.
3. Special design Williamson type output transformer multi-tapped at 4, 8, and 16 ohms to match your speaker requirements.
4. Amplifier, pre-amplifier and power supply are all contained on a single open flat chassis designed for the easiest construction.
5. All input and output connections are located on the rear apron of the chassis for magnetic phono or tape, crystal phono, tuner/radio, and mike or auxiliary.
6. Auxiliary Power Receptacle permits amplifier to supply power to other components such as tuner, phonograph, etc.
7. Self-balance phase inverter system and full range tone control amplifier.
8. Inverse feedback circuit.
9. A handsomely designed removable front panel for professional appearance in custom installations.
10. The amplifier can be used with an electric guitar, etc. or in a Public Address system.
11. By following the circuits of your choice, you can construct your own custom #2200 amplifier.

INSTRUCTION BOOK

NATIONAL KITS has compiled a 24 page "foolproof" instruction book complete with diagrams, illustrations, and easy to follow step by step construction details. WEIGHT: 10 lbs.
FINISH: Baked Hammertone, Golden Brown Finish Chassis
FRONT PANEL: Multi-Color High Styled Luxury Look Front Panel
CHASSIS: Pre-punched chassis (all holes)

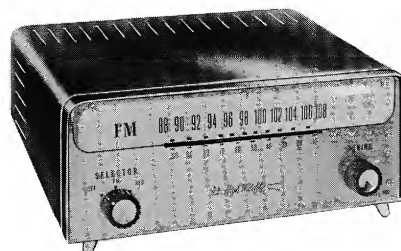

The Model #1100 FM Tuner is truly the outstanding value at a minimum of cost, using the most advanced engineering designs.

FM Multiplex; The output jack has high impedance and is a natural for any adaptor for the use of Multiplex reception, also matches any type Hi-Fi Amplifier input giving superb, truly High Fidelity Stereo broadcasts.

The #1100 has an Armstrong FM circuit and features a Limiter and Balanced Foster-Sealey Discriminator with a standard 75 micro-Second Deemphasis Circuit. Low noise front end uses a Triode grounded grid amplifier circuit and low noise type Triode Mixer. Powerful, advanced six tube circuit plus Selenium Rectifier provides maximum sensitivity and selectivity, and offers response of 20-20,000 cps. Other deluxe features include, full AFC to eliminate FM station drift, smooth counter weighted flywheel tuning, and indirectly illuminated slide-rule dial.

A SUPER-SENSITIVE, STANDARD BROADCAST AND SHORT WAVE RADIO

NATIONAL KITS Model #350 is a highly efficient super-sensitive two band, five tube superheterodyne standard broadcast and shortwave radio receiver that clearly picks up distant stations from all over the world. The radio covers full standard broadcast from 540 kc to 1700 kc and has a shortwave coverage from 5.8 to 18 megacycles, the most popular shortwave band for Foreign countries.

NATIONAL KITS supplies you with an extra-large pie-punched chassis and even a person without previous experience can easily build and enjoy this fine receiver. There is no cluttering of parts and the open flat chassis layout eliminates cramped and hard to get to places.

The instruction book is complete in all details and contains step by step instructions, large pictorial illustrations, and schematic drawings to make this radio fun to build. This is an excellent project for those interested in shortwave or in the communications field.

FEATURES

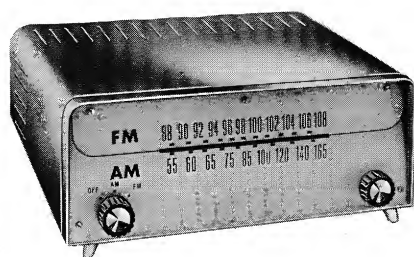

1. NATIONAL KITS supplies you with all quality components to enable you to build a standard broadcast and shortwave radio of professional design and performance, at a minimum of cost.
2. The Model #350 includes EVERYTHING..NO EXTRAS TO BUY !!!!
3. High Grain I.F. Transformers used for super sensitivity and selectivity for shortwave reception.
4. Over-sized pre-punched chassis designed for easiest construction.
5. Fine Vernier Tuning, Airplane Type.
6. Heavy cadmium plated chassis, none rust in all climates.
7. Hi "Q" built-in loop antenna.
8. AVC for stable volume.
9. Excellent pickup of hard to get stations.
10. School inquiries invited for special attention.
11. Available in bulk pack.

SPECIFICATIONS

Freq. Range: Broadcast 540 - 1700 kc
Shortwave 5.8 - 18 mc
Type: 5 Tube Superheterodyne
I.F. Frequency 455 kc
Antenna: Broadcast-loop antenna
Shortwave-external antenna or length of wire
Tuning: Vernier, Airplane Type
Speaker: 4" P.M. Voice Coil Impedance is 3.2 ohms
Power Output: 0.8 Watts undistorted
1.8 Watts maximum
Line Voltage: 105 - 125 Volts AC/DC
Power Drain: 29 Watts
Current Drain: .24 Amp at 117 Volts AC
Cabinet Color: Walnut Bakelite
Cabinet Size: 9 3/8" Wide, 6" High,
5 1/2" Deep

AM • FM TUNER

MODEL NO. 1000

ONLY \$31⁸⁵

10% FEDERAL EXCISE TAX INCLUDED

NATIONAL KITS engineering has made the Model #1000 the most efficient AM FM Tuner on the market, unmatched in its price class in beauty and performance. It is superbly designed with such costly features as smooth counter-weight tuning with built-in AFC defeat switch, advanced AFC circuitry that prevents drift as it locks in your station after selection, and a special temperature-compensated oscillator circuit as an additional aid in preventing drift. The powerful seven tube circuit plus Selenium Rectifier has an Armstrong FM circuit with a Balanced Foster-Seeley Discriminator and Limiter, a low noise FM front end using grounded

grid triode amplifier section and separate triode oscillator, and offers a 20-20,000 cps response. The AM section features a Superheterodyne Circuit with AVC and a powerful Ferrite Loopstick Antenna.

SPECIFICATIONS

Frequency Response: FM $\pm 1/2$ db 20-20,000 cps; AM 3 db 20-8,000 cps.
Frequency Range: FM 88 to 108 MC;
AM 540 kc to 1650 kc.
FM Drift: ± 5 kc maximum.
Sensitivity: FM 5uv for 30 db quieting; AM 25uv.
Selectivity: FM 200 kc bandwidth; AM 8 kc bandwidth.
Distortion: Less than 1% on FM.
Hum Level: 60 db.

Output Level: FM 2 Volts for 100% mod.; AM 1 Volt.

Controls (2): Off - AM - FM, Tuning with AFC incorporated.

Power Drain: 30 Watts at 105 - 125 Volts AC.

Size: 10 3/4" wide-4" high-8" deep.

Front Panel Finish: Mahogany, Ivory,

and Gold.

Cover Finish: Mahogany.

KITS INC.

Dear Friend:

We have a **Special Gift** for you.....The enclosed **Special Savings Certificate** is **worth five (\$5.00) dollars or more** in direct savings to you towards the purchase of any kit listed in our flyer. You buy direct from the manufacturer, thereby saving the middleman's profit. Thousands of our customers have also purchased directly from us.

You may purchase two (2) kits and save **\$10.00** or three (3) kits and save **\$15.00**. In other words, any kit listed is **\$5.00** less than the selling price. Please note that these prices on the brochure are not list prices. They are actual selling prices.

If you act fast, you can have the **full discount benefits** while we are still making this offer, which is only good for the next twenty **(20) days**. This offer is being made to a small number of people, like yourself, who have a vital interest in electronics. A bargain? **You bet it is.** You will learn how to build equipment of all kinds..... tuners, amplifiers, receivers, handy gadgets for the home and many more.

Our instruction manuals are chock-full of how-to-do-it diagrams and pictorial drawings and plans. **You get time-tested equipment**, which is just like factory made equipment at a fraction of the original cost. Above all, you get the fun and enjoyment of doing it yourself.

Our kits are continually being advertised nationally by the larger catalog houses; you no doubt have seen them over the years. Of course, we cannot mention them by name, but you can recognize them easily by the pictures of our kits. As you can see, these prices are **real down-to-earth** and represents a **tremendous savings to you**. Check our prices and you will see we are right. Make your selection....then fill out the handy order form stating your choice. List the total on the **Special Savings Certificate** form. Return same to us, with your remittance.

That's why I urge you to **take advantage** of this wonderful offer **within the next twenty (20) days** before this offer ends. Take advantage **NOW**. It will not be repeated. **ORDER TODAY.**

Cordially yours,
William Carter
William Carter
Sales Manager

SR/WC

P.S: You risk absolutely nothing when you accept our special discount offer because of our money-back guarantee. You may return any kit for a refund of the purchase price immediately. within 7 days
